Integrity Roof System™

A systems approach combines high-performance components – underlayments, shingles, accessory products and ventilation – to make the Integrity Roof System a complete roofing solution. When you choose an Integrity Roof System, you gain the advantage of having CertainTeed as your single manufacturing source to stand behind its roof system components.

WinterGuard®

Waterproofing shingle underlayment prevents leaks from wind-driven rain and ice dams in vulnerable areas.

Roofers' Select® or DiamondDeck®

High-performance underlayment provides a protective water-resistant layer over the roof deck and a secondary barrier against leaks.

Starter Shingles

Starter shingles are designed to work specifically with each different type of CertainTeed shingle for maximum performance.

CertainTeed Shingles

High-quality shingles available in a wide variety of styles and colors, covered by the strongest warranty in the business.

Flat Roofs

Flintlastic roofing products are available for flat roof areas.

Hip & Ridge Caps

Accessory shingles are used to finish the hips and ridges of the roof and are designed to complement the appearance of CertainTeed shingles.

CertainTeed Ridge Vents

CertainTeed Ridge Vents combined with sufficient intake vents, such as CertainTeed Intake Vents, are the most effective ventilation system.
